

poacher catcher

Poacher Catcher instantly alerts you when you have an intruder by phoning up to 4 pre-programmed phone numbers. As long as you have a mobile phone network, Poacher Catcher will alert you to an intruder, wherever you may be.

Poacher Catcher offers a viable solution to intruder detection and alert, without any of the drawbacks of conventional CCTV and alarm systems. It is a small, battery operated, self-contained unit which will monitor an area 24 hours a day. If an intruder is detected, Poacher Catcher will silently telephone one or more designated recipients so that appropriate action can be taken.

Using a Passive Infra-Red sensor, Poacher Catcher is activated by the movement of heat; i.e. a moving body or vehicle. We have specifically designed Poacher Catcher so the angle of detection avoids activation by small animals. Moving vegetation will not activate the unit.

- ❖ Ideal for use in remote areas with no power
- ❖ 100% waterproof
- ❖ Rechargeable battery lasts 3-4 months – can also be used via mains
- ❖ Sensor range is up to 10 metres
- ❖ Pre-focused detection area to avoid detection of small animals
- ❖ World-wide compatibility – any mobile phone network can be used
- ❖ Virtually maintenance free operation
- ❖ Simply turn on and the Poacher Catcher is ready within 2 minutes
- ❖ Built-in timer can be set by text commands
- ❖ Completely silent when activated
